3. Device Installation

• 1.First, put the waterproof trap on the radio. Then align the base of the antenna with the holes on the device, and secure the antenna to the device with screws.
Note: The waterproof trap is already installed in the radio by default.

• 2.Using 2 Metal Straps, Secure the Radio to the mounting pole.

• 3.Attach ground wire (not included) to the integrated grounding screw.

4. Application

• PTP

• PTMP

5. Web Management

• A) Boot Up Device

(1) Power on the device.

(2) Connect the PC to the PoE adapter using Ethernet cable

(3) Open a browser such as Chrome or Firefox and launch the login page with default IP 192.168.1.2, then type the password admin to enter the Management UI.

• B) Configure the Access Point

(1) Please finish LAN Settings, and then click Next.

(2) Wireless Settings: Choose Access Point Mode and create a new SSID (Network name) for your wireless network. And then select Encryption Mode and create a PSK Key to protect the device.

• C) Configure the Client

(1) Repeat step A) to make sure the device is powered on

(2) Please finish LAN Settings and make sure the subnet is the same as the Access Point, and then click Next.

(3) Wireless Settings: Choose Client Mode and enter the same SSID and PSK Key and select the same Encryption Mode as Access Point.
